

# April 30, 2024 | 348 Project meeting

**Attendees:** Jay Patel, Vamsi Doddapaneni, Shivansh Shrivas, Tej Gumaste, Jahnvi Maddila

**Partial Meeting Notes** - 5.1 / 6.1

**Meeting purpose** - GUI Discussion, Test cases, User Manual.

**Time** - 4:30pm - 5:30pm

**Venue** - Leep 1320

The primary focus of today's meeting was the GUI, which turned out to be a critical problem. After discussing, we consensually agreed to shift our approach from electron.js to developing a Web Application due to compatibility issues with the cpp backend.

Shivansh Shrivas has proactively initiated the setup of an alternative solution, leveraging the React.js environment for the GUI. He has successfully established the backend-frontend connection, leaving the GUI team with minor refinements.

Jay Patel and Vamsi Doddapaneni, as part of the GUI team, will oversee the final git commit for GUI implementation.

Subsequently, attention shifted towards drafting test cases and a user manual. Tej Gumaste volunteered to undertake the test cases document, committing to its completion before Thursday. Likewise, Jahnvi Maddila assumed responsibility for crafting the user manual document.

The meeting concluded with a brief recap of assigned tasks and associated deadlines:

Deadlines:

- i) GUI Team: Finalized by 11:59 pm Wednesday
- ii) Tej Gumaste: Test Cases Document due by 11:59 pm Wednesday
- iii) Jahnvi Maddila: User Manual Document due by 11:59 pm Thursday

For the last time, the meeting was adjourned at 5:20 pm.
